

**Celestron First Scope Raffle at Fall programs**  
By John Gilkison

When we saw these bargain Celestron First Scopes, we decided to acquire a couple of them to see if they were suitable as a beginners telescope for the public.

We found a good deal on some Plossl eyepieces online and ordered them for this telescope. We will be raffling off the First Scope with two Plossl eyepieces at the Fall programs for \$1.00 a ticket.

We will have the telescope at select programs to demonstrate it. The final drawing for this telescope will be held at on December 19th at City of Rocks State Park. Send this form and your check to the NPO to receive your raffle tickets by mail to.....
